

MAKING BRAINZ FIBERS

BRAINZ uses Force Sensitive Resistors but they need a support. I used blue thera-band (resistance band) because you can cut them in any shape you want and you can stick the FSR's with the adhesive back of the sensors.

Other tips:

- You can buy the theraband online or at sport shops or gyms.
- To keep the theraband on place, it's necessary to use crocodile clips. You can find them online or in electronics shops.
